

AWKB-4000US Wireless Compact Keyboard 2.4GHz with Touch Pad

This compact SlimTouch keyboard is perfect for tighter spaces, including the living room, kiosks/stations, conference rooms, mobile, and workgroup project environments. The Wireless SlimTouch Mini touchpad keyboard also features 2.4GHz RF connectivity, an ultra-slim, ultra-stylish design with clean lines, and an integrated touchpad – eliminating the need for a mouse. This unique keyboard fits beautifully with contemporary PC systems and flat LCD monitors in modern office environments. Its small, compact size is also extremely mobile easily fitting in a briefcase or backpack. When on the road, the USB mini-receiver plugs directly into a notebook or another PC providing connectivity up to 100 feet away.

Features

- 2.4 Ghz RF Smartlink with 256 Auto-Changeable IDs in the channel
- Mini-keyboard with 88 keys
- Built-in touchpad. Imitating mouse's function on both touch-pad and 2 beneath buttons.
- Ultra-stylish design with concise outline.
- Plug and Play – No software to Install.
- Quiet stroke and tactile feedback due to Membrane included.
