## What Makes ConnectPort™ WAN VPN Commercial Grade?

ConnectPort WAN VPN makes connecting devices easier by offering commercial-grade features such as:

<ul style="list-style-type: none"><li>• Enclosed module/PC Card prevents theft/damage</li></ul>	<ul style="list-style-type: none"><li>• Sturdy metal case for industrial applications</li></ul>
<ul style="list-style-type: none"><li>• Rugged external antenna provides standardized connections for maximum signal strength</li></ul>	<ul style="list-style-type: none"><li>• Extended temperature specs (-30° C to 60° C) for hardened environments</li></ul>
<ul style="list-style-type: none"><li>• RealPort® for optimized cellular connectivity to serial devices</li></ul>	<ul style="list-style-type: none"><li>• Digi SureLink™ uses 3-way method to provide “always-on” communications</li></ul>
<ul style="list-style-type: none"><li>• VPN for maximum security</li></ul>	<ul style="list-style-type: none"><li>• External LEDs for cellular/Ethernet status and signal strength ensure instant feedback for site surveys and troubleshooting</li></ul>

Perhaps the most important differentiator is Digi Connectware® Manager, the only truly enterprise class remote device management software available for cellular routers. Digi Connectware Manager is indispensable where customers require complete control over many remote devices.

Important Digi Connectware Manager features include:

<ul style="list-style-type: none"><li>• Digi devices “phone-home” to Digi Connectware Manager, so no public IP needed for management</li></ul>	<ul style="list-style-type: none"><li>• DDNS feature integrates with a DNS server to map a hostname to a device for dynamic IP public applications</li></ul>
<ul style="list-style-type: none"><li>• Monitor devices via email or SNMP on conditions like excessive data usage, disconnected cables, reduced signal strength, etc.</li></ul>	<ul style="list-style-type: none"><li>• Installs on Windows® server with access to devices from anywhere using web browser</li></ul>
<ul style="list-style-type: none"><li>• Remotely configure devices or groups of devices</li></ul>	<ul style="list-style-type: none"><li>• Troubleshoot using connection history stored in MS SQL database</li></ul>
