

USB-to-PCMCIA Card Reader for 3G Datacards U132 Series

Features

Easy connection to USB port

Suitable for use with laptops or desktops

Compact and rugged casing

Works with selected PCMCIA Cards

Low Power

Low cost

Take your 3G wireless internet access anywhere using the U132! This USB adapter allows the use of a wide number of high speed data cards via a USB port enabling these PC cards to be used with a desktop or laptop without a CardBus slot.

For both home and business use, the U132 adapter provides a PCMCIA slot via the USB Port, bringing UMTS or EDGE to modern laptops and desktop systems.

Cards currently supported on the U132:

- | | |
|----------------------------|-----------------|
| Option Globetrotter Fusion | - Singtel Optus |
| Option 3G Quad Card | - Singtel Optus |
| Huawei E618 | - Vodafone |

Further cards to follow – please check with MYCOM for up-to-date listing www.mycom.com.au
