

# USB-to-PCMCIA Card Reader for 3G Datacards U142 Series

## Features

**Easy connection to USB port**

**Suitable for use with laptops or desktops**

**Compact and rugged casing**

**Works with selected PCMCIA Cards**

**Low Power**

**Low cost**

Take your Bigpond 3G(Next G) wireless internet access anywhere using the U142! This USB adapter allows the use of a wide number of high speed data cards via a USB port enabling these PC cards to be used with a desktop or laptop without a CardBus slot.

For both home and business use, the U142 adapter provides a PCMCIA slot via the USB Port, bringing UMTS or EDGE to modern laptops and desktop systems.

Cards currently supported on the U142:

Bigpond NextG Option GX0202

– Bigpond (Telstra Australia)

Further cards to follow – please check with MYCOM for up-to-date listing

## Technical Features

32-Bit CardBus Cards supported, including CDMA, UMTS, EDGE & HSDPA. Note: if card includes Wireless LAN (802.11) connection this is not supported

USB Interface

Support Type I and II card sizes. Slot has ejector lever

Uses Elan's unique silicon to bridge between USB and 32-bit CardBus Interface

Supplied with software drivers for Windows 2000 and XP
