A NEW LEVEL OF RUGGED MOBILE PERFORMANCE WITH THE MOTION J3500

It's lightweight. It's rugged. And it's packed with integrated features that provide the performance, manageability and security your mobile workplace demands. Introducing the J3500 Tablet PC from Motion Computing®, with Intel® vPro™ Technology. Designed specifically with the mobile field professional in mind, this robust device takes powerful computing directly to the point of service.

GET READY FOR SEAMLESSLY-INTEGRATED POWER.

The J3500 is powerful, mobile and ready to take on a hard day's work. Now with the Intel® Core™ i7 vPro™ Processor or Core™ i5 vPro™ Processor, the J3500 has nearly a 40% performance improvement and new remote management capabilities, as well as all the standard features you have come to expect from a mobile computing device.

Opt for the **dual touch screen** with palm rejection technology and with just a pinch or tap of your fingers, you can scroll, pan, rotate and zoom your way through your workday. Touch interaction makes scrolling through long web pages or documents, looking up information on the Web, or navigating the task bar quick and easy. Switch to the digitizer to complete forms, capture customer signatures or input handwritten data.

Stay connected with the integrated **WiFi 802.11 a/g/n** and enhanced **Gobi™2000** mobile broadband. Document job site activities or take a patient's photos with the J3500's built-in **3.0MP digital camera**. Use geo-tagging and date stamping features to document proof of work in seconds with available GPS technology.

Not only is the J3500 equipped with a **dual hot-swappable battery** design to extend the workday, it's also built to integrate seamlessly with enterprise applications, so adding a J3500 to your workplace is simple.

Take your J3500 with you no matter where work takes you.

The perfect balance of performance, power and durability for any work environment.

FULLY-EQUIPPED, RUGGED AND FLEXIBLE.

The J3500 works hard when it's time to do hard work. It's tough enough to survive harsh mobile work environments, making your mobile job more productive. For the strongest, brightest, most viewable display, you can choose the J3500 with Motion's **View Anywhere Display®** and **Gorilla™ glass** for up to a **four times improvement in breakage resistance!**

At only **3.6 lbs?** the J3500 might seem like a lightweight, but an internal magnesium frame for structural rigidity, port covers and a rubberized coating for dampening shock help it to meet **IP-52** and **MIL-STD-810G** standards. Plus, the slip-free surface means you can prevent drops before they happen.

**Protect.

Powerful, Rugged Mobile Computing at the Point of Service

ENSURE A SECURE, ROBUST MOBILE WORK ENVIRONMENT.

Work more safely. Work more securely. And never sacrifice performance. Improved security features on the J3500 offer the latest advancements to protect your system. New Intel® vPro™ technology enables IT to remotely isolate PCs from the network for upgrade or repair and the security designed into the PC hardware provides anti-theft capabilities. Work any place at any pace, confident that your sensitive information is safe.

ACCESSORIZE YOUR SOLUTION TO MEET EVERY NEED

FlexDock Docking Station

This sleek docking station has a battery charger bay and four USB, DVI-D, Ethernet, audio and display. It can be directly mounted to VESA compatible devices, or used as a desktop replacement.

Battery Charger

An external bay to charge additional batteries. The charger's small footprint saves valuable desk space while the LED indicates battery charge status. Rapidly charge additional batteries within 2 hours.

*Additional batteries sold separately

Mobile Keyboard

The durable J-Series Mobile Keyboard is cable-less, reliable and extremely light at less than 1 lb. Attach it to the back of any J-Series Tablet PC for easy transport.

Work Anywhere Kit

For an easy, safe way to carry your J-Series Tablet PC, add a Work Anywhere Kit. With a flip cover for additional screen protection, a pouch to carry an extra battery and an attachable strap the Work Anywhere Kit is a must have accessory for any J-Series Tablet PC.

Top: Viewability in any environment.

Left: On-the-go note taking and markup.

Flexible Input

Simply and efficiently navigate, input information and sign forms with the precision of the digitizer pen or the familiarity and ease of your finger.
