HMT310 Humidity and Temperature Transmitter

The Vaisala HUMICAP® Humidity and Temperature Transmitter HMT310 models (from left to right): HMT313, HMT317, HMT314, HMT318, HMT315 and HMT311.

Features/Benefits

- Next-generation Vaisala HUMICAP[®] Sensor for excellent accuracy and stability
- Full 0 ... 100 %RH measurement, temperature range up to +180 °C (depending on model)
- Small size, easy to integrate
- Insensitive to dust and most chemicals
- NIST traceable

Reliable Vaisala HUMICAP[®] Technology

The HMT310 incorporates the latestgeneration Vaisala HUMICAP® Sensor. The Vaisala HUMICAP® Sensor is a capacitive thin-film polymer sensor. It features high accuracy, excellent long-term stability and negligible hysteresis. It is insensitive to dust, particulate dirt and most chemicals.

Several Outputs, One Connector

The HMT310 is powered up with 12 ... 35 VDC. It has two analog outputs and an RS-232 serial output. The output signal and the supply power travel in the same cable, the only cable connected to the unit.

Chemical Purge

Chemical purge helps to maintain measurement accuracy between calibraton intervals and it involves heating the sensor to remove harmful chemicals. The function can be initiated manually or programmed to occur at set intervals.

Optional Functions

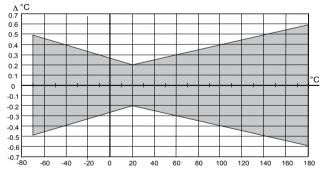

The following optional functions are available: several probes for various applications, calculated humidity quantities, different mounting kits, sensor protection options and probe cable lengths, warmed probe and sensor heating for high humidity conditions (HMT317), and chemical purge for applications risking an interference with chemicals in the measuring environment.

Technical Data

Measured Values		
RELATIVE HUMIDITY		
Measurement range	0 100 %RH	
Sensor		
Vaisala HUMICAP®180R	typical applications	
Vaisala HUMICAP®180RC	applications with chemical	
	purge and/or warmed probe	
Accuracy (incl. non-linearity, hy	ysteresis and repeatability)	
at a temperature range of		
+15 +25 °C	±1 %RH (0 90 %RH)	
	±1.7 %RH (90 100 %RH)	
-20+40 °C	±(1.0 + 0.008 x reading) %RH	
-40+180 °C	±(1.5 + 0.015 x reading) %RH	
Factory calibration uncertainty	±0.6 %RH (0 40 %RH)*	
(+20 °C)	±1.0 %RH (40 97 %RH)*	
* Defined as ±2 standard deviation limits. Small variations possible, see		
also calibration certificate.		
Response time (90 %) at +20 °C	C 17 s with grid filter	
in 0.1 m/s air flow	50 s with grid and steel, netting filter	
	60 s with sintered filter	
TEMPERATURE		
HMT311	-40 +60 °C (-40 +140 °F)	
HMT313	-40 +80 °C (-40 +176 °F)	
	or -40+120 °C (-40+248 °F)	

HMT314,HMT315,HMT317,HMT318 -70 ... +180 °C (-94 ... +356 °F)

General

ochiciai		
Operating temperature range	e for	
electronics	-40 +60 °C (-40 +140 °F)	
Storage temperature range	-55 +80 °C (-67 +176 °C)	
Operating pressure		
HMT314	0 100 bar	
HMT318	040 bar	
HMT315, HMT317	vapor tight	
Transmitter housing materia	l G-AlSi10Mg	
Transmitter base material	ABS/PC	
Housing classification	IP65	
Cable feed through	8-pole connector with 5 m cable,	
alternatives	Female 8-pin connector screw joint for	
	cable diameter 4 8 mm	
Sensor protection	PPS grid with stainless steel net,	
	PPS grid, Sintered filter	
	Membrane stainless steel filter	
Complies with EMC standard EN61326-1, Industrial environment		

Note: When using the current output, the RF field susceptibility level according to standard EN61000-4-3 with a frequency band of 110 ... 165 MHz, is only 3V/m (generic environment) with the specified accuracy.
