Vaisala HUMICAP® Humidity and Temperature Transmitters HMD60 and HMD70 are designed for use in air conditioning applications where accurate and stable control of relative humidity and temperature are required.

The duct mounted Vaisala HUMICAP Humidity and Temperature Transmitters HMD60 and HMD70 are designed for monitoring relative humidity and temperature in building energy management systems. The combination of high accuracy, stability, and reliable operation make these products the ideal choice for demanding applications.

# Resistant to Chemicals and Dust

The duct mount HMD60 and HMD70 transmitters can also be used in many industrial humidity monitoring applications, where their stability and

resistance to chemicals and dust are of great value. A useful feature of these duct mount transmitters is the ability to remove the electronics without removing the unit from the duct.

# Measures both Humidity and Temperature

The HMD60 and HMD70 transmitters are available in three models: U for humidity measurement only, Y for humidity and temperature measurement, and T for temperature only.

# **Fast, On-Site Calibration**

The accuracy of the transmitters is simple to check using either Vaisala HUMICAP Hand-Held Humidity and Temperature Meter HM70 or Vaisala HUMICAP Humidity Indicator HMI41. The calibration can be done in seconds with a single potentiometer without disturbing the operation, resulting in great savings both in maintenance time and costs.
